WHOLESALE SEED GROWERS

*Main Office*

**MILFORD, CONNECTICUT**

**U. S. A.**

## **NON-WARRANTY**

F. H. WOODRUFF & SONS GIVE NO WARRANTY, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs, roots or plants they sell, and will not be in any way responsible for the crop. Purity or germination, when given, are the result of our tests, and are entirely without warranty.

## **TERMS OF SALE**

At the prices named herein, our terms are net 60 days, or less  $1\frac{1}{2}\%$  for cash within 10 days from date of invoice. Onion sets, grass and field seeds are strictly Net Cash. All goods f. o. b. shipping point. Cash or satisfactory references must accompany orders from unknown correspondents; otherwise shipment will be made C. O. D., or sight draft against shipping documents. Containers charged extra at value, and are not returnable.

The quotations in this list are intended for the seed trade only, and are based on our present or estimated supply. We reserve the right to decline orders or advance prices without notice. Ask us for special quotations on large quantities.

## **WHEN ORDERING**

Please do not fail to specify how goods are to be shipped; whether by freight, express or parcel post.

When telegraphing orders, you may use our telegraphic code. Code words for varieties are found opposite the name of each variety; code words for quantities are listed on the inside back cover. Please do not use the code when ordering by mail.

*Send your orders to our nearest branch.*

TO OUR TRADE:

It gives us considerable pleasure to present you with our Trade Price List for 1933, in which we have expressed values as we see them today, although we are always glad to make special quotations on quantity orders upon request.

It has been and will continue to be our aim to supply only the best stocks that can be produced, recognizing the established fact that no worthwhile seed business was ever built up on cheaply grown or indifferent seed stocks.

Within a year we have taken over a large radish growing operation in Michigan, as well as a vine seed growing station at Rocky Ford, Colorado, and are now in a position to produce our own stocks of these sorts with our own experienced production men and under our personal supervision. With our immense acreages of peas and beans, largely produced on our own ranches in Wyoming, and with other growing stations in California, Idaho, Montana, Washington, Illinois, Ohio, Michigan and Connecticut, we believe no one concern is in a better position to supply the best seed stocks at minimum prices.

As to the important matter of service, our location at Milford enables us to handle the New England and eastern trade most promptly, and we can give overnight freight service as far south as Baltimore and as far north as Portland. Our well equipped plant and office at Toledo carries a complete line of all seeds for the central and far west states. Vine seed orders can be shipped from Rocky Ford, and our branch at Mercedes, Texas solicits your business for Texas and the Rio Grande valley. Our Atlanta branch renders quick service throughout the South, with splendid daily package car service from that point.

Send your orders either to the main office or the most convenient branch, and we can assure you of prompt and courteous attention.

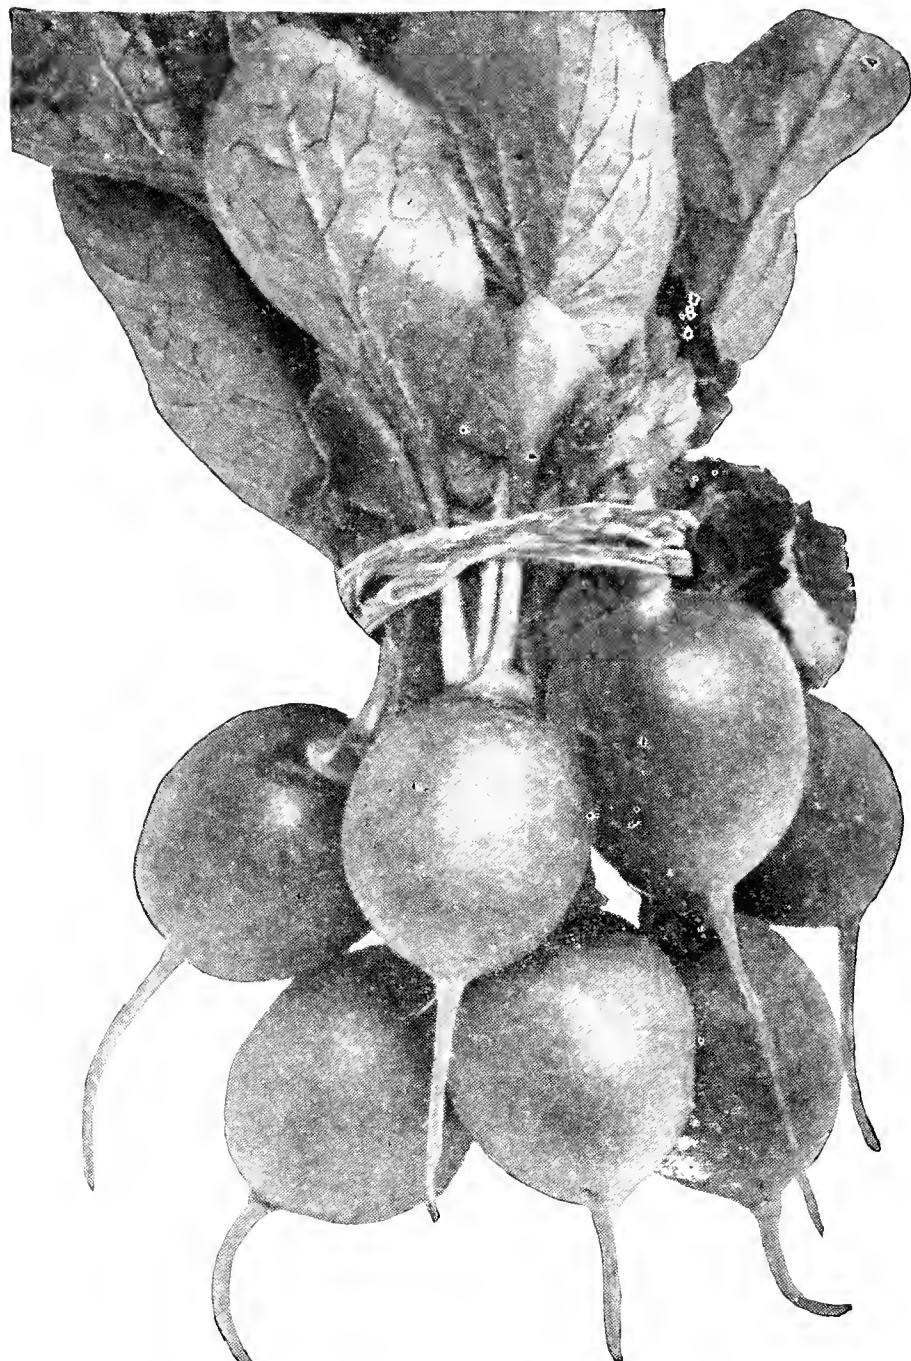

As the season advances, our travelers will be visiting you for both spot and future business, and we wish to assure you that any orders, regardless of quantity, will receive our personal attention.

Thanking you for past favors and trusting that the service rendered in the past will merit a continuance of your patronage, we remain,

Yours very truly,

January 2, 1933

F. H. WOODRUFF & SONS

**Vick's Scarlet Globe**

## **R A D I S H**

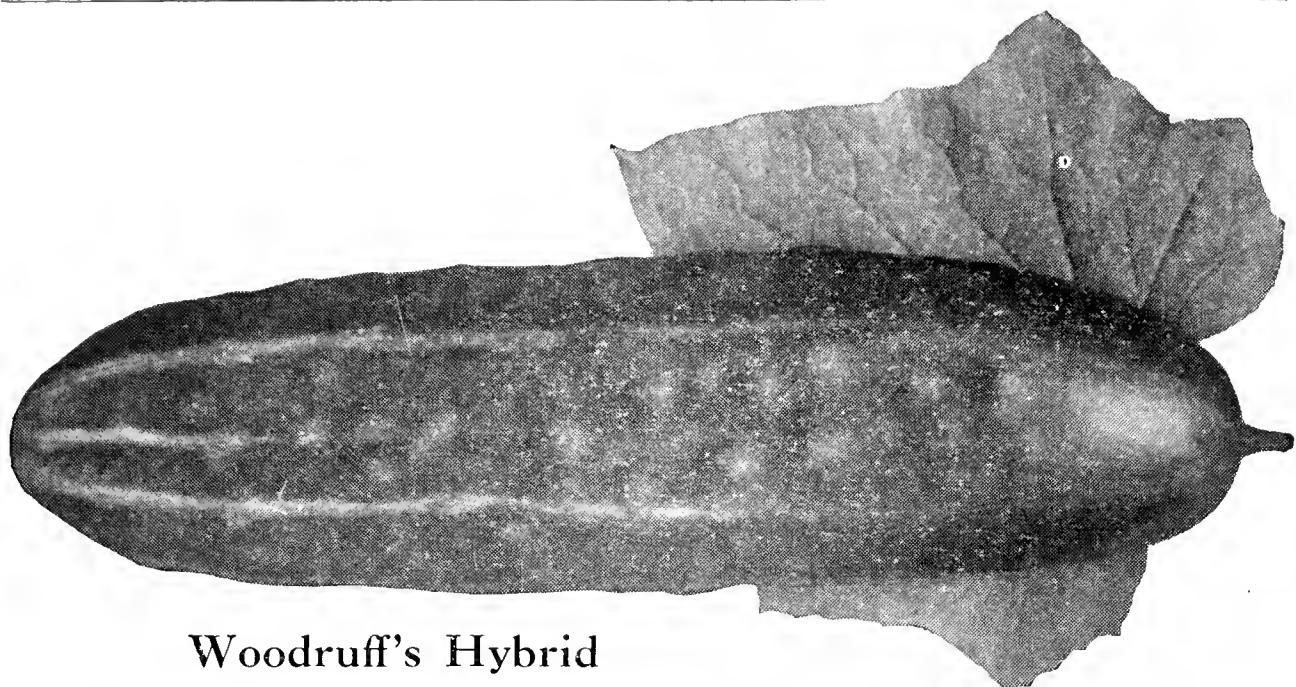

Probably more generally grown than any variety, either under glass or out of doors, immense acreages being planted in the South for shipment North. In form more elongated or globe shaped than Saxa, bright scarlet in color and of easy culture.

In the production of radish seed the quality of the seed depends to a large extent on the work put on the planting stock, the selection of the roots as to a fixed type, both in color and form, and size of top as well as uniform maturity.

We are producing our seed in northern Michigan, using as our planting stock seed from carefully transplanted radish roots. By transplanted roots we mean roots which, when grown, are dug up, carefully selected by hand and only the most perfect roots reset. This is expensive work and adds to the cost of production. Some growers ignoring quality and selling on a price rather than a quality basis, eliminate this work and are able to sell radish seed for less money.

Our growers of radish seed are experienced men, many of whom have been growing this seed upwards of thirty years.

We give especial attention to the forcing types for greenhouse growing, and have every reason to believe our stocks will give excellent satisfaction to the most critical trade.

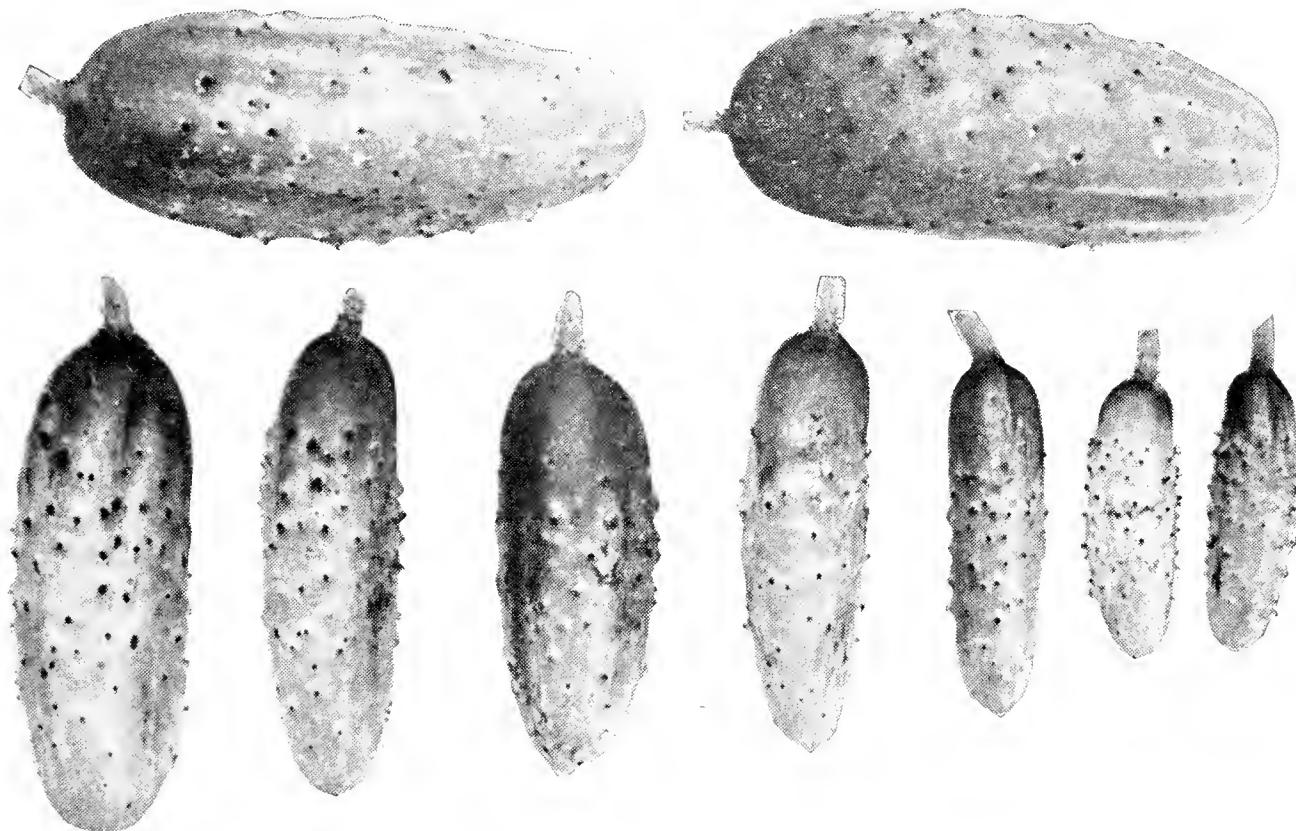

### Woodruff's Hybrid

### C U C U M B E R

This variety is noted particularly for its fine shape, good length, and above all for its dark green color, which it holds a long time. We consider it the best all-around cucumber variety in existence, and so will you.

---

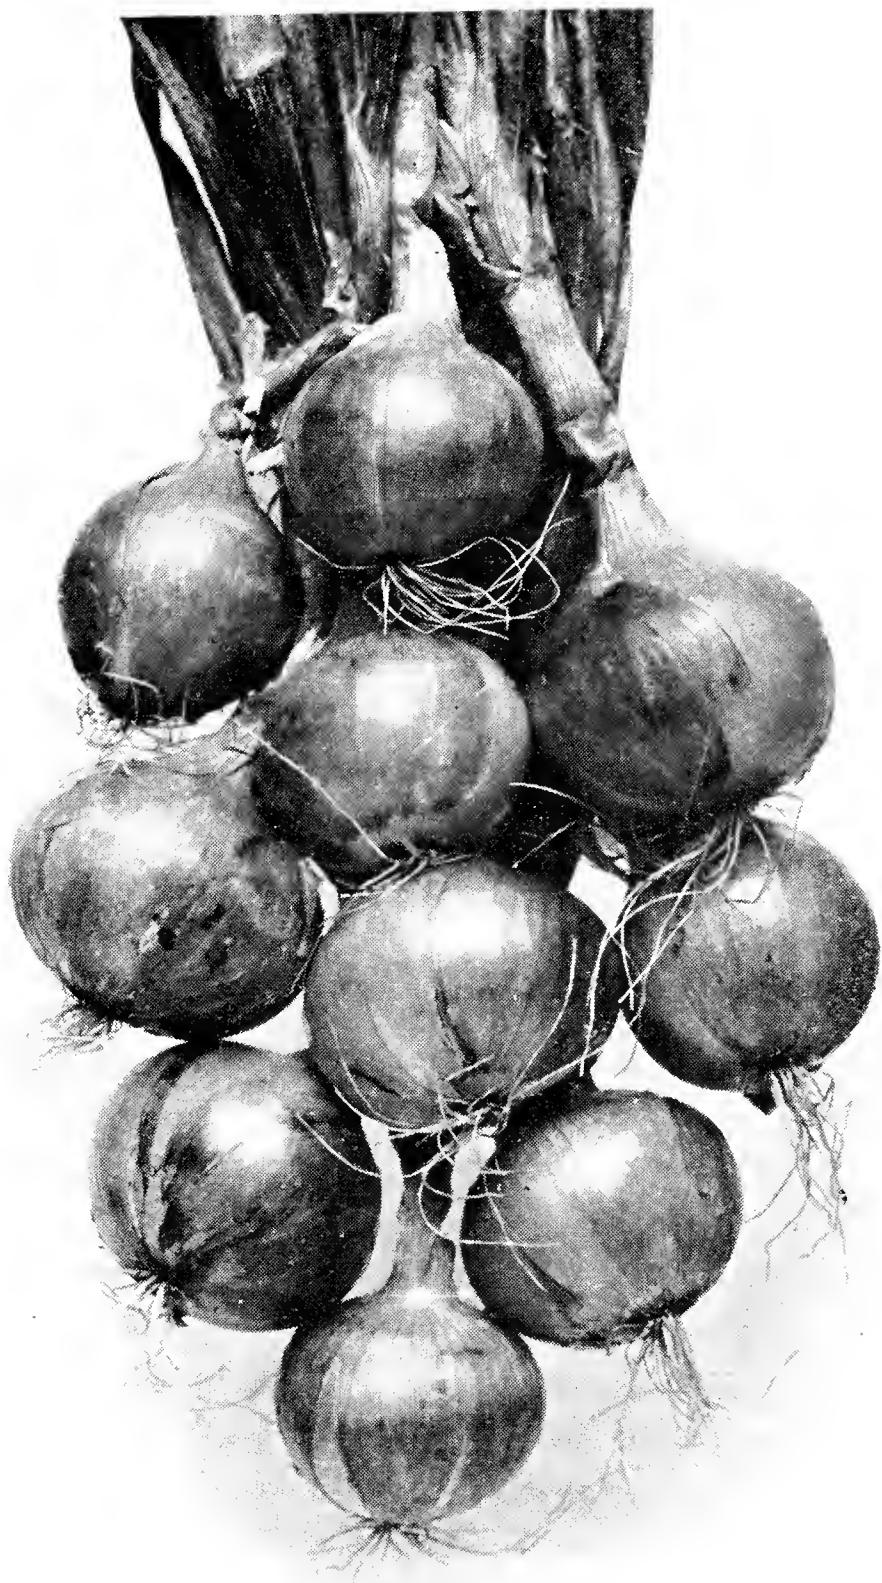

### National Pickling

After several years of research and selecting, this variety was adopted by the National Pickle Packers Association, as the best general purpose pickling cucumber. Equally adaptable for dills or as a bottle pickle.

---

We have been to considerable expense in the developing of true to type stocks of various sorts, and have every confidence that our stocks, once used, will bring to us repeated business.

All of the vining types we produce are grown at Rocky Ford, Colorado, under experienced, critical supervision, seed being saved only from perfect fruits, and we candidly believe our stocks are unsurpassed for dependability.

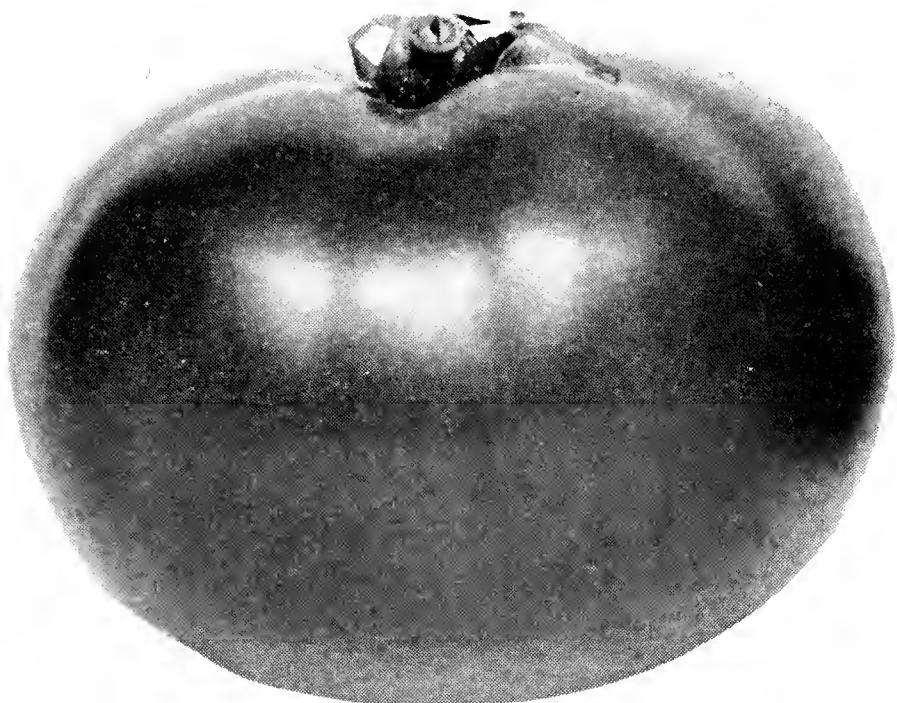

## Early Yellow Globe

### ONION

*Positively the Earliest Yellow Globe Onion.*

This is our own introduction, and is a new strain, not merely another name for an old variety. It is a fine globe shaped onion with a beautiful deep yellow color. Further, it is a splendid winter keeper, and will stand storage better than most early sorts, as its skin is very thick. As to maturity, it can be put on the market fully three weeks earlier than the Danvers or Southport strains of yellow globe, and yields very heavily.

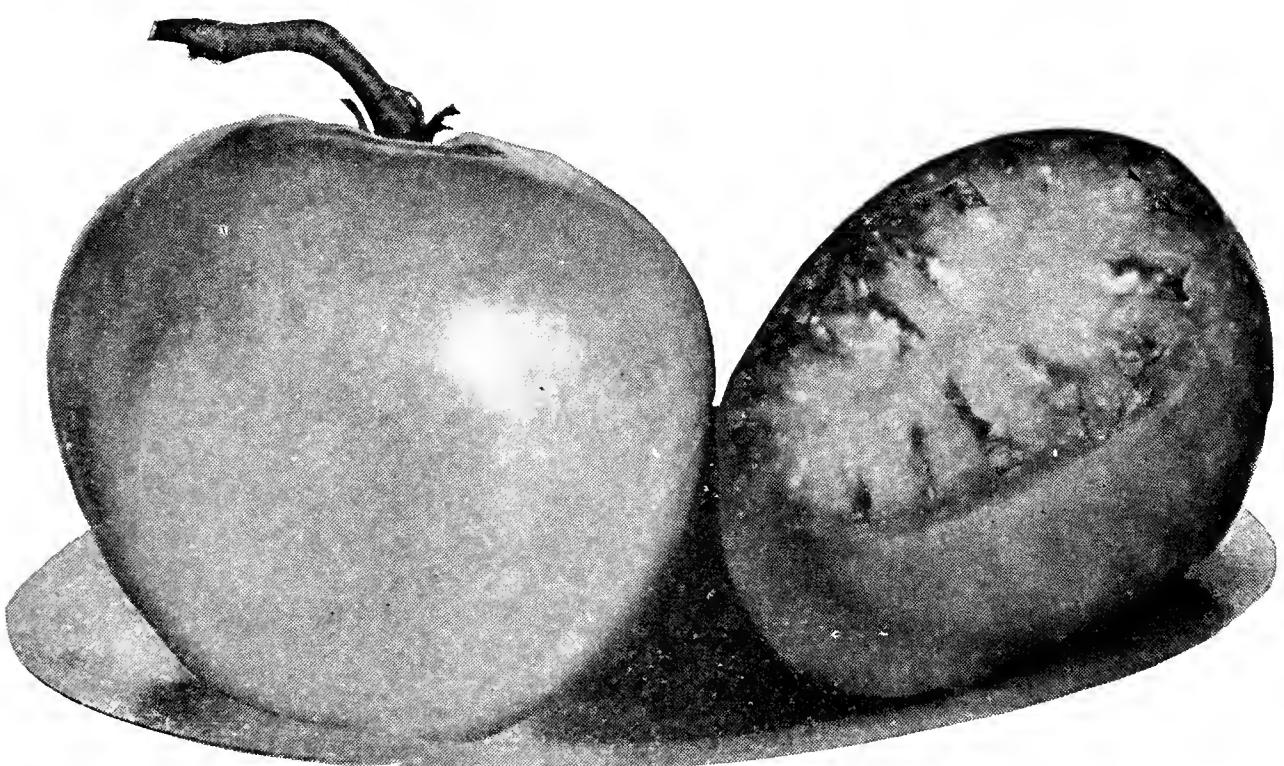

Special Earliana

### T O M A T O

A special selection of this variety which, while larger than the old type of Earliana, is earlier, has a thicker skin and ripens well up to the stem end; very free from cracks. Grows a small but vigorous vine with smooth, globe shaped fruit, solid and bright scarlet.

We are growing these specialties from our own selected seed stock. Their quality is above the ordinary, as a trial will prove.

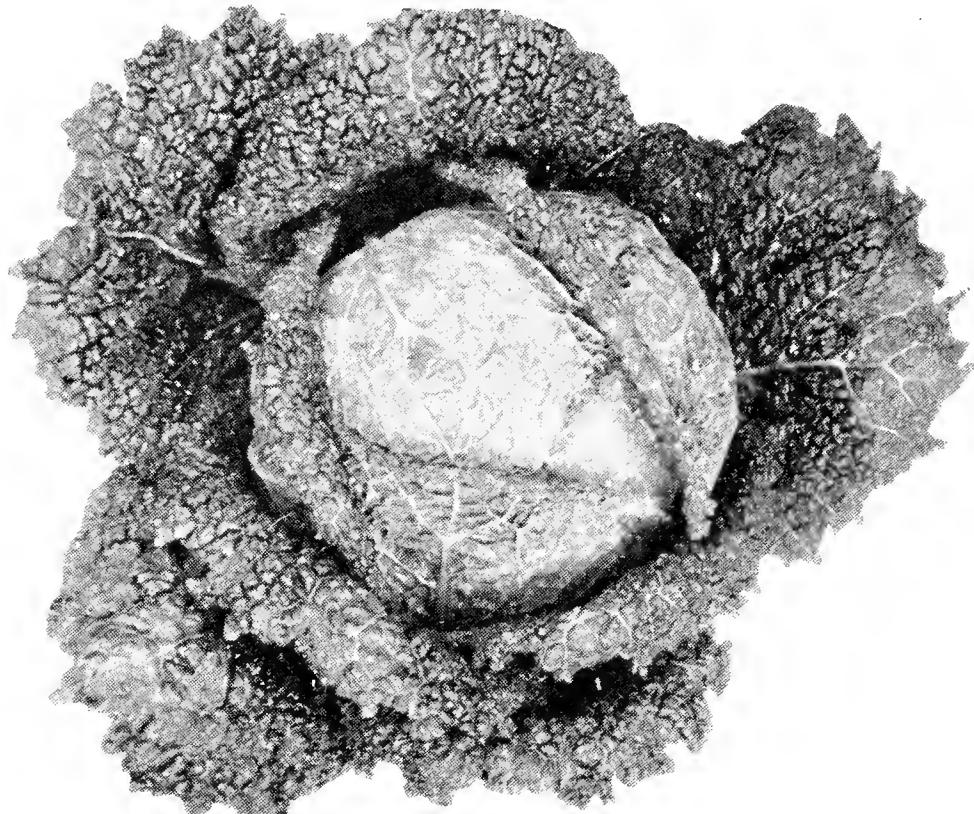

Oxheart

### T O M A T O

*The specimen above measured 5½ inches deep by the same in width.*

One of the largest tomatoes, weighing up to two pounds or more. Its shape is distinctive, "oxheart", and it is without doubt the finest slicing variety on the market, owing to its unusual solidity and almost total absence of seed cells. Our strain is unbeatable.

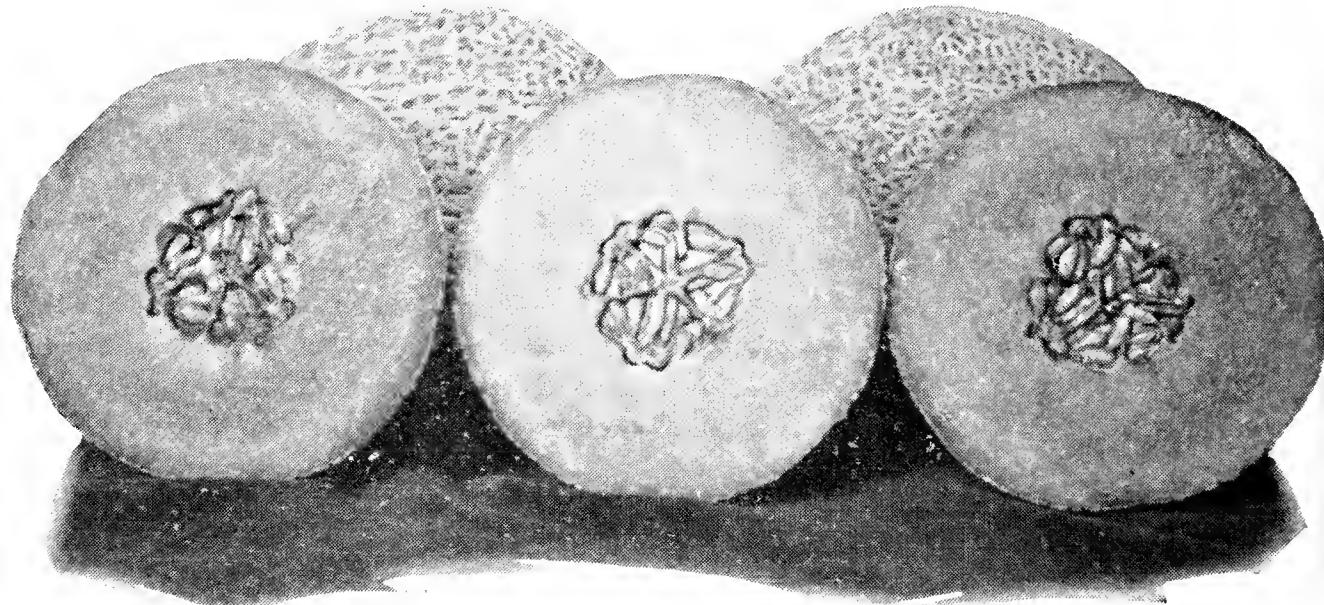

C A B B A G E

**Special Long Island Savoy**

One of our own special strains of cabbage, originally obtained on Long Island and reselected and maintained by ourselves.

Its uniformity and color have earned it a reputation beyond our modest expectations.

**Orange Flesh (Perfecto Perfecto)**

**M U S K M E L O N**

The finest shipping melon of the Rocky Ford type known today, this variety is noted for its flavor, sweetness, hardiness, productivity, thick salmon-colored flesh and uniformity. It is nearly round, densely netted, only slightly ribbed, and with the smallest seed cells of any shipping melon. Our strain is perfect.

This and other vine crop seeds are produced at our own growing station at Rocky Ford, Colorado, and under the same careful and personal supervision which is given all of our seed crops.

Stocks grown under such conditions should not be compared with those produced by slip-shod methods, and we are confident that your experience with our seeds will strengthen this conviction in your mind.

*Write for our complete current list of grass seeds and lawn mixtures.*

## TELEGRAPHIC CODE FOR QUANTITIES

The following code words for quantities will be found convenient for use in cablegrams and telegrams in conjunction with our code words for varieties. In writing such coded messages, use the following order: *First*, How shipment is to be made (mail, express or freight); *Second*, the quantity; *Third*, the variety. Examples:—

Freight 120 lbs. Bountiful Beans — FREIGHT VEX BALBOUN.

Freight 112 lbs. Thomas Laxton Peas and express 25 lbs. Saxa Radish — FREIGHT VESTRY PENTHOM EXPRESS VERB RASAX.

Mail 1 lb. each Wonderful Celery and Ailsa Craig Onion — MAIL VARLET CELWON DITTO OLSA.

Caution must be used in sending coded telegrams, however, as we will not be responsible for errors arising from the sending or transmission of coded messages. *Use this code only in telegraphic orders, not in letters.*
